COMPACT design

CURVED design

COMPACT design

It can be easily moved to the desired location with four wheels, the front wheels having brakes.

Easy to use with color TFT LCD screen and user-friendly interface

It is designed to fill quickly without removing the bottles from the place/pallet. With a 5-meter hose and a specially designed filling gun, it fills the desired amount of liquid by simply pressing the button on the gun.

SUPERIOR FEATURES

Any size desired, starting from 500 mL
fast and clear filling

Ability to save and change 10 different recipes
and delete feature

2 different volume unit selection (milliliter, liter)
Also able to work in time mode

Suitable for food, oil, cleaning products,
fertilizers or chemicals

All equipment in contact with liquid
AISI 304 or AISI 316 stainless steel

EASY INSTALLATION

It is ready to operate when it is connected via a hose from the tank or IBC to the machine inlet and energized. Any pneumatics etc. does not require the system. The outlet hose and filling gun are easily connected with stainless camlock.

filling GUNS

The large filling gun is especially designed to make fillings over 1 liter faster. Although it varies depending on the liquid viscosity, filling can be done with a flow rate of approximately 50-70 l/min. The nozzle attached to the end is adjusted according to the canister length and mouth diameter.

filling guns

3/8"

The small filling gun is designed to fill all sizes of fillings at optimum speed. Although it varies depending on the liquid viscosity, filling can be done with a flow rate of approximately 40-50 l/min. The nozzle attached to the end is adjusted according to the canister length and mouth diameter.

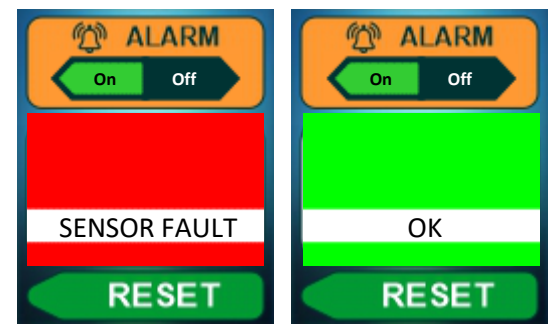

EVERYTHING IS UNDER CONTROL...

On the filling screen;
the selected recipe,
content of the recipe
(set value),
instant filling
tracking,
You can track and
control the total
number of fillings.

If you wish, you can
stop the flow and
continue where you
left off.

In case of any error, it
stops the flow by
giving an audible
and visual warning
on the screen and
informs you about
the relevant fault.

MASS AND EASY PRODUCTION...

Save the recipe,
Press the button!

TECHNICAL SPECIFICATIONS

- Mains voltage 380V (Optional 220V)
- Specially designed filling gun with 300 mm nozzle (6 bar)
- 10 bar pressure-resistant Hose Kit with 5 meters Sensor Cable (Stainless Camlock for Easy Connection)
- Saving, loading, and changing 10 recipes
- Ability to work automatically with time intervals
- Robust, durable compact steel body design
- Corrosion-resistant static coating paint
- Color TFT LCD Screen
- Software with a user-friendly, understandable interface
- Information and warning screens
- Ability to instantly monitor the liquid passing through the "Active Value" compartment
- Ability to continue where it left off with the feature of holding/stopping the flow in automatic mode
- 2 different volumetric measurement selections (milliliter, liter)
- Program calibration feature
- Easy connection directly to the installation
- Device liquid inlet direction can be adjusted according to the installation direction
- Audible and visual error and warning notifications
- Short circuit, overload, and overvoltage protection
- Withstands 300 VAC surge input for 5 seconds

OPTIONAL FEATURES

Especially for fillings of 1 liter and below, we offer a nozzle and foot pedal installed instead of a filling gun to make small fillings quickly. Timed filling can also be done from the "Repeated Filling" menu in the software.

←30 liters of intensive detergent filling
